

The deck you've been waiting for is finally within your grasp.

Come on.
Jump on board.

A wood deck only looks good – and costs less – the first year.

As wood ages and is subjected to weather, the rich, warm color fades, splinters surface, boards warp and crack, and mold and mildew begin to grow.

When you chart the cost of ongoing yearly maintenance that wood requires to keep looking decent, it can really add up. And, if you try to spread out that maintenance – power washing, sanding, scraping and staining, even replacing deck boards – it only gets worse.

Wood Decks – Will Cost More in the Long Run
Scraping, Sanding and Staining can cost \$300-\$500 every other year.

Wood deck maintenance could cost an additional \$1500 to \$3000 every 5 years!

The couple dollars more it costs to do it right with Endeck® comes back to you sooner than you would think.

ENDECK
PVC DECKING

Endeck.
An end to the drudgery
of deck maintenance.

Question: If wood rots, splits, cracks, warps and offers up splinters to threaten our children's tender feet, why do people still build decks out of it?

Answer: Until now, there hasn't been Endeck.®

Endeck is the perfect combination of strength, good looks, and easy care.

Strength:

Endeck is engineered to resist sagging that can occur with wood and ordinary composite decking. It's lighter in weight than composite or wood deck boards, but has great strength and durability. Endeck boards meet or exceed stringent AC10 and AC174 standards, and have been tested and certified CCRR-0144 code-approved for strength and safety. The PVC compounds we use are tougher too, and stand up against foot traffic better as a result.

Architectural Appeal:

Endeck's PVC deck boards have an embossed woodgrain on **both sides** with real-wood appeal. The surface of Endeck mimics the look and feel of real wood, and the colors – Beechwood, Olivewood, Ashwood and Ironwood – will match or contrast nicely with your home's existing siding, fencing and railing. All the leading hidden fastening systems work well with Endeck, for a fastener-free surface.

Low-Maintenance:

Even though it may look like wood, it certainly doesn't act like wood. No scraping, sanding or staining. No twisted, cracked or warped boards to replace. Clean-up is practically effortless; a spray of the hose removes most dirt and grime. And it's comfortable under foot – cool to the touch even on the hottest of days.

Colors to complement your landscaping. Strength to complement your lifestyle.

Endeck's color goes completely through the board, not just on the surface, so scratches will weather to a softer color in due time. Endeck boards are strong, durable, have a high impact resistance, and provide excellent traction wet or dry.

Colors shown are by the lithographic process and may vary slightly from actual product.

Minimal maintenance. Maximum enjoyment.

Simple care and maintenance will keep your Endeck lasting and looking natural

With very little effort, you can keep Endeck looking clean and new. A few squirts from the garden hose will suffice; dirt, grease and droppings can be removed using simple household cleansers and a soft cloth.

The finishing touch.

Endeck also offers Fascia board, to provide a clean, finished look to your deck. Fascia, like Endeck deck board, is capped and embossed on both sides, and can be easily reversed if necessary, allowing for a flawless finish. Fascia boards are 7/16" x 11-7/8" x 12'. All Endeck products carry a Class A flame spread rate.

Decking and Railing go hand-in-hand.

Now you can get both from Enduris. Enrail is a low-maintenance railing system that has great architectural appeal for today's homes. Enrail is a comprehensive railing program that has been tested, certified and CCRR-0107 code-approved for safety and quality. It's available in three styles, each with several options for height, span, and color.

Enrail looks great paired with Endeck PVC decking, or a concrete front porch. It's a wonderful replacement for old, rotten wood – it's constructed of smooth PVC, so you'll never have to worry about splinters, warping or weathering. For more information, go to www.enrailing.com.

Something else you won't get with wood.

A warranty.

Endeck resists rotting, warping, checking and insect infestation. Check out the complete warranty at endecking.com.
